WEARABLE

8675i Wearable Scanner

The 8675i offers always at-hand wearable scanning to improve workflow productivity. Premium scanning performance including FlexRange™ option enables wearable efficiency. Small, lightweight and ergonomic, the 8675i will help your workers perform.

Overview

The 8675i is designed for superior performance providing always-at-hand scanning to enhance workflow productivity. With premium scanning capabilities, it processes even damaged or low-quality barcodes swiftly.

Wearable Efficiency:
Ergonomically optimized, the 8675i minimizes height off the finger to avoid interference in workspaces. All user-contact surfaces are designed for comfort, allowing easy adjustments and simple use. The triggered ring can be easily swapped for left or right-hand configurations, while the low-profile finger strap buckle prevents finger interference. Users can convert from ring to glove to lanyard/belt clip options seamlessly and without tools, and accessories accommodate a comprehensive size range.

FlexRange™ Scanning:
FlexRange Scanning technology allows users to scan from near contact to 5 feet for 100% UPC and up to 10 meters (33 feet) for 100 mil Code 39 barcodes, enabling wearable efficiency in a wider range of applications. Standard range configurations offer high speed scanning at a lower cost for workflows where extended range is not required.

Designed for Demanding Workflows:
The 8675i supports multi-shift operations with a replaceable battery for extended service life. Rated for 2,000 tumbles and equipped with IP65 sealing for durability in harsh environments, this device also features a new outdoor aimer for precise targeting in bright sunlight, ensuring optimal performance in various conditions. User-facing LEDs indicate Bluetooth status, battery charge, and health.

Specifications

FEATURES

For Use With

- 8675i chargers and accessories

Features

- Triggered ring or glove form factors

Connectivity

- Bluetooth

DIMENSIONS

Overall Dimensions

- 65.2mm x 30.3mm x 15.2mm (2.6 in x 1.2 in x 0.6 in)

SCANNING SPECIFICATIONS

Scan Distance

- Mid Range (0-5m)
- Standard Range (0-1m)

NETWORK

Bluetooth Specifications

- 5.1

HARDWARE

Battery Type

- Li-ion Battery

Charging

- Contact Charging

ENVIRONMENTAL

Storage Temperature Range

- -20C to 60C (-4F to 140F)

Operating Humidity

- 0 to 95% relative humidity (non-condensing)

STANDARDS & APPROVALS

Protection Ratings

- IP65

IP Rating

- IP65

Drop Specifications

- 1.8m Mil-Std-810; 50x1.5m (5') drop to concrete across operating temperatures

SERVICE TERMS

Warranty Duration

- Two years (battery one year)
